

Advanced Transportation careers and training

The advanced transportation sector includes industries providing transportation of passengers and cargo, warehousing and storage for goods, and support activities related to modes of transportation. The modes of transportation are air, rail, water, road, and pipeline. Support activities include the routine repair and maintenance of transportation equipment, such as aircraft, railroad rolling stock, cars, trucks, and ships. Many establishments in this sector often operate on networks with physical facilities, labor forces, and equipment spread over an extensive geographic area.
